Work Experience

Pletra Technologies India Pvt. Ltd. **Aug 2024 - Jan 2025 | Pune, Maharashtra**

Associate Software Engineer

- Configured Salesforce Flows to automate the creation and update of Employee, Manager, and HR records, and developed a feedback form for external users with data stored in the Admin database.
- Created and managed Products and Product Bundles with various pricing strategies, including Basic, Attribute-based, and Advanced, along with Promotions and Discounts, and built a robust Case Management System using FlexCards, OmniScripts, DataRaptors, and Integration Procedures.
- Performed functionality, regression, and system testing on both web and mobile applications to ensure optimal performance and reliability across platforms.

Twopir (2πr) Consulting Pvt. Ltd. **Jan 2022 – April 2023 | Pune, Maharashtra**

Associate Salesforce Developer

- Designed and developed scalable Salesforce solutions using Apex Classes, Apex Triggers, Lightning Web Components (LWC), Visualforce, and REST API integrations to meet complex business needs.
- Implemented Batch Apex for efficient data processing, collaborated with cross-functional teams to deliver custom features, and ensured deployment readiness through robust Apex test coverage.

- Designed interactive user interfaces by creating Lightning Record, App, and Home Pages using Lightning App Builder and custom-built LWC components.
- Performed Salesforce administration tasks including object and field customization, Flow automation, data management with Data Loader, report and dashboard creation, sharing rules configuration, and user access management through profiles, permission sets, and role hierarchies.

Projects

ServiceAtEase

- Performed manual testing of web and mobile applications to ensure functionality, usability, and performance across multiple browsers and devices.
- Wrote comprehensive test cases covering positive and negative scenarios, and identified, documented, and tracked bugs with detailed reproduction steps throughout the development cycle.
- Collaborated with developers, designers, and product teams to resolve issues efficiently and drive continuous improvement in product quality.

GoldSoil-Reality-Property Management

- Performed functional, system, and end-to-end testing of Salesforce CRM features to validate business processes and ensure application stability. Created and executed test cases and scenarios, prepared test documentation, and verified application behavior against business requirements.
- Tested Salesforce configurations including objects, fields, page layouts, Flows, reports, and dashboards, and conducted API and integration testing using Postman.
- Identified and reported bugs and defects, collaborated with developers for resolution, and validated fixes through retesting.

Aventria Health Group

- Customized Salesforce by creating and managing Lightning Apps, custom objects, fields, page layouts, validation rules, formula fields, and automated Flows based on client requirements. also configured Reports, Dashboards, and Sharing Settings to support data visibility.
- Performed accurate data import using Data Loader by cleaning and formatting raw Excel data, ensuring seamless data migration and integrity. Developed Apex triggers, batch classes, test classes, and custom settings. implemented REST API-based integration with external systems, adhering to Salesforce development and security best practices.
